EDUCATIONAL BACKGROUND

BS Computer Science - Machine Learning, National University - Manila | 2022 - Present

Information and Communication Technology, Army's Angels Integrated School | 2020 - 2022

ACADEMIC PROJECTS

Data-Driven Analysis of Daily Stress Levels and the Effectiveness of Stress-Relief Activities | 2025

The project focuses on analyzing personal stress data collected from a smartwatch to understand daily stress patterns and evaluate the effectiveness of various stress-relief activities.

Learning Through Play: Evaluating Reinforcement Learning Algorithms in Integer Damath | 2025

Implemented and compared reinforcement learning algorithms, Q-Learning, Monte Carlo, and Dyna-Q, to develop intelligent agents for the educational game Integer Damath. Evaluated algorithm efficiency, learning speed, and decision-making performance.

ArtDecode: Leveraging Convolutional Neural Networks for Multi-Class Art Style Classification | 2025

Engineered a computer vision model with 63.08% accuracy using custom Convolutional Neural Network (CNN) architectures in TensorFlow for classifying art styles using the WikiArt Dataset.

Predicting Flight Delays: Using Regression Analysis | 2024

Developed a machine learning model to predict flight arrival delays using Random Forest Regression. Performed data preprocessing, feature selection, and exploratory data analysis to improve prediction accuracy and support data-driven insights for airline operations.

Manufacturing Resource Planning (MRP) System for ABC Manufacturing | 2024

A centralized system designed to streamline production planning, inventory control, and procurement processes. It helps ABC Manufacturing optimize resource allocation, reduce material shortages, and improve overall operational efficiency through real-time data tracking and automated scheduling.

SEMINARS, TRAININGS, WORKSHOPS

Concourse: Charting New Horizons in Technology, College of Computing and Information Technology Student Council | 2025

Navigating the Path to Academic Publishing in Computer Science, Computer Science Society | 2024

Dev Showcase: Mastering Git & GitHub GDG on Campus - National University - Manila | 2024

Collab Plus: Optimizing Team Collaboration with Google Workspace and Notion Templates, GDG on Campus - National University - Manila | 2024

TECHNICAL SKILLS

Programming Languages: Python, Java, NoSQL, SQL

Tools and Technologies: Jupyter Notebook, Google Suite, Microsoft Office, Git, GitHub

Libraries / Frameworks: Pandas, TensorFlow, Matplotlib, NumPy, PyTorch, Seaborn

AFFILIATIONS

Treasurer, NU-CCIT Student Council | July 2024 - July 2025

Office-in-Charge, Office of the Auditor, NU-CCIT Student Council | Nov 2023 – July 2024
